MOHAMED AMIN AYED

Tunisia · +216 55 066 152 · mohamedamin.ayed@supcom.tn · LinkedIn · GitHub

2nd year ICT engineering student at SUP'COM specializing in networking and cybersecurity with hands-on experience in configuring and securing enterprise networks, VPN deployment, routing protocols, and infrastructure monitoring. Experienced with Fortinet, Cisco IOS, and cloud networking, with strong troubleshooting skills in complex environments.

EDUCATION

SUP'COM — EUR-ACE© Accredited degree in ICT Engineering (*Cybersecurity & Networking*) *Expected: 2027*

IPEIM — Math/Physics Preparatory Classes for Engineering Schools: (*ranked 143/1700 in the national exam*) *Completed: 2024*

EXPERIENCE

Network Security Engineer — **PEARLS CONSULTING** *(Part-Time)* *Dec 2025 – Apr 2026*

- **Configured** and **Secured** enterprise Networks using **Fortinet NGFWs** (VLANs, SD-WAN, ZTNA, Policies) & NAC (**Entra ID**, **Radius, Segmentation**).
- Implemented **network performance monitoring** with **Microsoft EDR** and **Nagios** using **SNMP**, **SLA**s, and **custom python** and **bash scripts**.
- Deployed **secure connectivity** solutions: **Overlay VPNs**, **client** and **site to site VPNs** for remote offices and employees as well as **load balancing**.
- Designed and maintained a disaster recovery plan (**DRP**) for infrastructure failures or breaches, ensuring **business continuity.**
- Performed **IT support** and **network troubleshooting** for **international** technical and non-technical teams.

Application Security Architect — **CERT** *(Internship)* *March–May 2026*

- **Designed** and **implemented** secure **multi-tenant SaaS** architecture with **Row-Level Security** and **IAM** (RBAC/PBAC, SSO, MFA, OAuth2).
- Integrated audit logging and monitoring mechanisms to support security visibility, troubleshooting and incident detection.

Cybersecurity Intern — **DOTCOM** *(Internship)* *Jun–Sep 2025*

- Performed **penetration testing** and **security assessments** on SaaS **Cloud infrastructure** following OWASP principles.
- Identified **1 high-severity** authentication flaw, **2 misconfigurations**, and **2 sensitive data leaks** through API fuzzing and Vulnerability testing.
- **Hardened network-facing services,** implementing **rate limiting, WAFs, traffic filtering, Portknocking...**
- **Secured** containerized environments using **network controls (iptables), isolation mechanisms,** and **least-privilege** configurations.
- Conducted **log analysis** and **monitoring** to detect anomalies and support incident response.

Online Python Tutor *(Part-Time)* *2022 – Present*

- Applied effective **communication in French and English** to explain complex programming topics to international students: **Belgium**, **Italian, Canadian.**

PROJECTS

- Fortinet's NGFW FortiGate Network configuration and security — [GitHub]
- Cisco IOS network configurations (routing, VLANs, DNS) using Packet Tracer — [GitHub]
- **DD-WRT:** Site-to-site VPN on **Embedded Linux** — [GitHub]
- **Port Knocking**: Hiding open admin ports from hackers — [GitHub]

SKILLS

- Networking:
  ⁘ Device Configuration: Fortinet NGFW (Forti OS), Cisco IOS, Aruba, NAC, VLAN, ZTNA, VPN deployment, infrastructure monitoring (SNMP).
  ⁘ Network analysis and troubleshooting (Wireshark, tcpdump, tracert, netcat, netstat), OSI model, TCP/IP, DHCP, DNS, LAN, WAN, NAT, BGP, OSPF.
- Cybersecurity:
  ⁘ Iptables, Windows Firewall, Windows Defender, Trivy, Cryptography (PKI, TLS, SSLyze, SSLscan), common attack vectors and vulnerabilities.
  ⁘ Black/Gray box Web and API Pentesting (OWASP), Burp Suite, Nmap, cURL.
  ⁘ Microsoft Security Stack (Defender EDR/ASR/XDR, Entra ID (Azure Active Directory), Intune, Sentinel), log analysis (Splunk), MFA.
- Cloud:
  ⁘ Microsoft Security stack, SharePoint, Exchange, MS365.
  ⁘ AWS cloud essentials (EC2, S3, Lambda, VPC...), security fundamentals, IAM.
- System Administration:
  ⁘Linux (Red Hat, Kali Linux, Ubuntu), Windows, Docker/LXC containers, DD-WRT / NVRAM, Virtualization (VBoxCLI, VBox, WSL).
- Programming & Automation:
  ⁘Python, Bash scripting, basic Assembly and JavaScript, browser automation and scraping (Selenium, Playwright), Version Control (Git).

CERTIFICATIONS

∗ ISC2 CC ∗ CCNA 1 & 2 ∗ Red Hat RH124/RH134 ∗ HCIA-WLAN ∗ AWS Cloud Practitioner ∗ AWS Cloud Security ∗ TOEIC C1 ∗

OTHER EXPERIENCES

- **Freelance** Video Editor: Produced digital content for **international clients**, managing **end-to-end projects** with tight deadlines. [Portfolio]
- **Manager** at Team Sup'Com; Elected to **Train** and **Manage** the design teams responsible for the visual branding of SUP'COM's major events. [Image]
- **Top Rankings** in CTFs and numerous hackathons and competitions (competitive programming, Ideathons, HTB, THM…). [Award]
- **Award winning** PACTE **humanitarian** project: helped students with hearing impairment pursue better careers through technology. [Award]
- **1st place** in university-level football Tournament. [Award]
