MOHAMED AMIN AYED

Tunisia · +216 55 066 152 · mohamedamin.ayed@supcom.tn · LinkedIn · GitHub

2nd year ICT engineering student at SUP'COM with experience in infrastructure security, risk assessment, and strong interest in consulting. Skilled in designing secure architectures, ensuring compliance, and communicating with international teams and clients.

EDUCATION

SUP'COM — EUR-ACE© Accredited degree in ICT Engineering (*Cybersecurity & Networking*) *Expected: 2027*

IPEIM — Math/Physics Preparatory Classes for Engineering Schools: (*ranked 143/1700 in the national exam*) *Completed: 2024*

EXPERIENCE

Cybersecurity Engineer — **PEARLS CONSULTING** *(Part-Time)* *Dec 2025 – Apr 2026*

- Supported **cybersecurity consulting** activities including procurement categorization, licensing and cloud usage **optimization** for **cost reduction**.
- **Endpoint security** and **IAM** via **MS Intune** and **Entra ID**, enforcing **EDR/ASR** policies, and conditional access, with **Compliance** checks.
- Designed a disaster recovery plan (**DRP**) for ransomware, data-loss (Cloud to Cloud Backup) and infrastructure failures, ensuring business continuity.
- **Configured** and **Secured** enterprise Networks using **Fortinet NGFWs** (VLANs, SD-WAN, ZTNA, Policies) & NAC (**Entra ID**, **RADIUS**).

Application Security Architect — **CERT** *(Internship)* *March–May 2026*

- **Designed** and **implemented** secure **multi-tenant SaaS** architecture focusing on **IAM** and **Risk mitigation** (RBAC/PBAC, SSO, MFA, OAuth2).
- Built **JWT** authentication flows, secure user onboarding, role delegation mechanisms preventing privilege escalation and lateral movement.
- Applied secure credential management and **aligned system design** with **security best practices and compliance requirements**.

Penetration Tester — **DOTCOM** *(Internship)* *Jun–Sep 2025*

- **Penetration testing** and **Securing** a SaaS platform following **OWASP methodology** and **SOC 2 Compliance**.
- Identified **1 high-severity** authentication flaw, **2 misconfigurations**, and **2 sensitive data leaks** through API fuzzing and Vulnerability testing.
- **Hardened** Nginx reverse proxies and **secured containerized workloads reducing attack surface** and improving **system resilience**.
- Performed **vulnerability analysis** and **log monitoring** to support **risk identification** and **continuous security improvement**.

Online Python Tutor *(Part-Time)* *2022 – Present*

- Applied effective **communication in French and English** to explain complex programming topics to international students: **Belgium**, **Italian, Canadian.**

Design Manager — **Team SUP'COM** *(freelance)* *May 2025 – May 2026*

- Elected to **Train** and **Manage** the design teams responsible for the visual branding of SUP'COM's major events coordinating with multiple stakeholders.

Video Editor — **BEHANCE** *(freelance)* *2025 – Present*

- Produced digital content for **international clients**, handling requirements and delivering tailored **end-to-end projects** with tight deadlines.

SECURITY & INFRASTRUCTURE STACK

- Infrastructure and Networking:
  - Network **analysis** and **troubleshooting**, OSI model, TCP/IP, DNS, BGP, OSPF.
  - Device Configuration: Fortinet NGFW (Forti OS), Cisco IOS, Aruba, NAC, ZTNA, VPN, monitoring (SNMP).
- Offensive Security:
  - Black/Gray box Web and API **Pentesting** (OWASP), reconnaissance and exploitation using Burp Suite, Nmap, sqlmap, Gobuster, ZAP, Shodan, cURL.
- Defensive Security:
  - **Microsoft Security** Stack (Defender EDR/ASR/XDR, Entra ID (Cloud Active Directory), Intune, Sentinel), log analysis (Splunk), KQL, MFA.
  - Iptables, Windows Firewall, Windows Defender, Trivy, **Cryptography** (PKI, TLS, SSLyze, SSLscan), common attack vectors and vulnerabilities.
- Cloud:
  - Microsoft Security stack, SharePoint, Exchange, MS365.
  - **AWS** cloud essentials (EC2, S3, Lambda...), security fundamentals, **IAM**.
- System Administration:
  - **Linux** (Red Hat, Kali Linux, Ubuntu), **Windows**, Docker/LXC **containers**, **Virtualization** (VBoxCLI, VBox, WSL).
- Programming & Automation:
  - Python, Bash **scripting**, basic Assembly and JavaScript, browser automation and scraping (Selenium, Playwright), Version Control (Git).

PROJECTS

- **SaaS Security Assessment Report** — [GitHub]
- **AI-powered SOC investigation** using **Microsoft XDR AIR** — [GitHub]
- **Malware Analysis** DFIR Simulation — [GitHub]
- **Port Knocking**: Hiding open admin ports from hackers — [GitHub]
- VEx: **Sandbox** for suspicious .exe file running and investigating — [GitHub]

CERTIFICATIONS

∗ ISC2 CC ∗ CCNA 1 & 2 ∗ Red Hat RH124/RH134 ∗ Cisco Ethical Hacker ∗ AWS Cloud Practitioner ∗ AWS Cloud Security ∗ TOEIC C1 ∗

OTHER EXPERIENCES

- **Top Rankings** in CTFs and numerous hackathons and competitions (competitive programming, Idea-thons, HTB, THM…). [Award]
- **Award winning** PACTE **humanitarian** project: helped students with hearing impairment pursue better careers through technology. [Award]
- **1st place** in university-level football Tournament. [Award]
