MOHAMED AMIN AYED

Tunisia · +216 55 066 152 · mohamedamin.ayed@supcom.tn · LinkedIn · GitHub

2nd Cybersecurity Engineering student at SUP'COM specializing in offensive security with hands-on experience in web and API penetration testing following OWASP methodology. Skilled in vulnerability discovery, and secure architecture design for SaaS platforms and Networks.

EDUCATION

SUP'COM — EUR-ACE© Accredited degree in ICT Engineering (*Cybersecurity & Networking*) *Expected: 2027*

IPEIM — Math/Physics Preparatory Classes for Engineering Schools: (*ranked 143/1700 in the national exam*) *Completed: 2024*

EXPERIENCE

Systems & Security Administrator — PEARLS CONSULTING *(Part-Time)* *Dec 2025 – Apr 2026*

- **Assessed** Network and endpoint **security** posture by identifying attack surfaces, misconfigurations, and unprotected assets, accounts, and services.
- **Secured** and **Monitored** enterprise Networks using **Fortinet NGFWs** (VLANs, SD-WAN, ZTNA, Policies).
- **Endpoint security** and **IAM** via **MS Intune** and **Entra ID**, enforcing **EDR/ASR** policies, and conditional access, with **Compliance** checks.
- Performed **IT support** and **network troubleshooting** for **international** technical and non-technical teams.

Application Security Architect — CERT *(Internship)* *March–May 2026*

- **Designed** and **implemented** secure **multi-tenant SaaS** architecture with **Row-Level Security** and **IAM** (RBAC/PBAC, SSO, MFA, OAuth2).
- Built **JWT** authentication flows, secure user onboarding, role delegation mechanisms preventing privilege escalation and cross-tenant access.
- Applied **secure credential handling**, audit **logging**, and **secure coding practices**.
- **Penetration tested** platforms developed by other interns to identify exploitable vulnerabilities.

Penetration Tester — DOTCOM *(Internship)* *Jun–Sep 2025*

- **Black-box** and **gray-box penetration testing** on **SaaS** platform following **OWASP.**
- Identified **1 high-severity** authentication flaw, **2 misconfigurations**, and **2 sensitive data leaks** through API fuzzing and Vulnerability testing.
- **Documented** vulnerabilities and suggested remediations to developers.
- **Implemented** remediations to the identified vulnerabilities following **SOC 2 Compliance:** iptables, rate-limiting, unprivileged runtimes, read-only fs.
- **Mentored** a final-year student intern in **penetration testing** methodologies and tools**.**

Online Python Tutor *(Part-Time)* *2022 – Present*

- Applied effective **communication in French and English** to explain complex programming topics to international students: **Belgium**, **Italian, Canadian.**

PROJECTS

- **SaaS Penetration testing** — [GitHub]
- **Network Penetration Testing**: firewall evasion, packet sniffing & spoofing, ARP cache poisoning... — [GitHub]
- **Embedded system penetration testing**: from firmware analysis to unauthorized access — [GitHub]
- **Malware Analysis** & DFIR — [GitHub]
- **Port Knocking**: Hiding open admin ports from hackers — [GitHub]

SECURITY & INFRASTRUCTURE STACK

- **Offensive Security**:
  ⁘ **Black**/**Gray** box **Web** and **API** Pentesting (**OWASP**), reconnaissance and exploitation using Burp Suite, Nmap, sqlmap, Gobuster, ZAP, Shodan, cURL.
- Defensive Security:
  ⁘ Microsoft Security Stack (Defender **EDR/ASR/XDR**, **Entra ID** (Cloud Active Directory), **Intune**, **Sentinel**), log analysis (**Splunk**), MFA.
  ⁘ **Iptables**, **Windows Firewall**, **Windows Defender**, Trivy, **Cryptography** (PKI, TLS, SSLyze, SSLscan), common **attack vectors** and **vulnerabilities**.
- Networking:
  ⁘ Device Configuration: **Fortinet** NGFW (Forti OS), **Cisco** IOS, **Aruba**, NAC, VLAN, ZTNA, VPN deployment, infrastructure monitoring (SNMP).
  ⁘ Network analysis and troubleshooting (Wireshark, tcpdump, tracert, netcat, netstat), **OSI model**, **TCP/IP**, DHCP, DNS, LAN, WAN, NAT, BGP, OSPF.
- Cloud:
  ⁘ **Microsoft** Security stack, SharePoint, Exchange, MS365.
  ⁘ **AWS** cloud essentials (EC2, S3, Lambda...), security fundamentals, IAM.
- System Administration:
  ⁘Linux (Red Hat, Kali Linux, Ubuntu), Windows, Docker/LXC containers, DD-WRT / NVRAM, Virtualization (VBoxCLI, VBox, WSL).
- Programming & Automation:
  ⁘Python, Bash scripting, basic Assembly and JavaScript, browser automation and scraping (Selenium, Playwright), Version Control (Git).

CERTIFICATIONS

⁕ ISC2 CC ⁕ CCNA 1 & 2 ⁕ Red Hat RH124/RH134 ⁕ Cisco Ethical Hacker ⁕ AWS Cloud Practitioner ⁕ AWS Cloud Security ⁕ TOEIC C1 ⁕

OTHER EXPERIENCES

- **Freelance** Video Editor: Produced digital content for **international clients**, managing **end-to-end projects** with tight deadlines. [Portfolio]
- **Manager** at Team Sup'Com; Elected to **Train** and **Manage** the design teams responsible for the visual branding of SUP'COM's major events. [Image]
- **Top Rankings** in CTFs and numerous hackathons and competitions (competitive programming, Ideathons, HTB, THM…). [Award]
- **Award winning** PACTE **humanitarian** project: helped students with hearing impairment pursue better careers through technology. [Award]
- **1st place** in university-level football Tournament. [Award]
